SKILLS

Python

FastAPI · Playwright · PyTest · Automation

Data

SQL Server · MySQL · SQLite · REST APIs

DevOps

Docker · Linux · Git / Forgejo · CI/CD · Nginx

Integration

GeneXus · PKI · OAuth2 / JWT · n8n

Web

Java · Spring Boot · React · Tailwind

LANGUAGES

Spanish — Native

English — B2 · Professional

EDUCATION

Information Systems Engineering
UTN – Córdoba Regional Faculty
2022 – 2027 (4th year) · GPA 7.78/10

ALSO

Team organizer in group projects · Component-level hardware repair

Franco Arteta

Functional Analyst & Process Automation

Python Development · SQL · Docker · CI/CD

PROFILE

4th-year Information Systems Engineering student (UTN-FRC) and Functional Analyst & Process Automation at Eling Energía (Argentina). I work where business processes meet software: I gather how teams actually work, find what can be automated and build the systems that solve it.

EXPERIENCE

Functional Analyst & Process Automation
Apr 2026 – Present

Eling Energía S.A.

- Gather requirements with business teams and model processes as the company moves to process-driven work (flow boards and tickets in **Redmine**).
- Built end to end an internal **digital-signature** platform: PKI with **EJBCA** and **SignServer** on **Docker**, integrated with **GeneXus** (authentication, RBAC), with PDF reading and form-field filling.
- Automated the Finance payment-validation workflow: approval, e-signature and email notifications.
- Connectors between **SQL Server** and internal **REST APIs**, plus **Python** scripts that remove manual work.
- Setting up **Forgejo** with CI/CD (**Forgejo Runner**) for our internal projects.

IT & Infrastructure Intern
Apr 2025 – Apr 2026

Eling Energía S.A.

- IT infrastructure for 100+ users: **Active Directory**, **Microsoft 365**, GPOs and security groups.
- LAN, corporate Wi-Fi, IP telephony (**VoIP**), intranet deployment and inventory with **OCS Inventory**.
- **Python** scripts for recurring tasks, including a VoIP call-alert system backed by SQL Server.

FEATURED PROJECTS

Transcripto — Python · React · SQLite · Faster-Whisper
Desktop app that turns meetings into Word minutes with local or cloud AI. Used at my company. Demo: transcripto-showcase.vercel.app

Self-hosted home lab — Debian · Docker Compose · Nginx · WireGuard
24/7 server with 15+ containers, TLS reverse proxy, IPS and VPN; FastAPI + Playwright API orchestrated with n8n.

Spring Boot microservices — Java 21 · Keycloak · OAuth2/JWT · Docker
Distributed backend with API Gateway and centralized authentication.

Video Automation Bot — Python · Gemini API · Scraping
Automatic short-video creation: content sourcing, image generation, audio and synced subtitles.
