FRANCO ARTETA

Functional Analyst & Process Automation | Python · SQL · Docker · CI/CD

Córdoba, Argentina · +54 9 351 6423293 · franarteta23@gmail.com · linkedin.com/in/franarteta · github.com/franarteta

PROFESSIONAL SUMMARY

4th-year Information Systems Engineering student (UTN-FRC) and Functional Analyst & Process Automation at Eling Energía (Argentina). I gather requirements with business teams, model processes and build the internal systems that automate them: a PKI-based digital-signature platform integrated with GeneXus, an automated payment-approval workflow and connectors between SQL Server and REST APIs. Side projects in Python, React and Docker. English B2.

WORK EXPERIENCE

Functional Analyst & Process Automation — ELING ENERGÍA, Córdoba — Apr 2026 – Present

- Gather requirements with business teams and model processes as the company moves to process-driven work (flow boards and tickets in **Redmine**).
- Built end to end an internal **digital-signature** platform: PKI with **EJBCA** and **SignServer** on **Docker**, **GeneXus** integration (authentication, RBAC) and automatic PDF reading with form-field filling.
- Automated the Finance payment-validation workflow: approval, rejection, e-signature and email notifications.
- Connectors between **SQL Server** and internal **REST APIs**, plus **Python** scripts that remove manual work.
- Setting up **Forgejo** for version control with CI/CD on **Forgejo Runner**; meeting minutes with **Transcripto**, my own app.

IT Support & Infrastructure Intern — ELING ENERGÍA, Córdoba — Apr 2025 – Apr 2026

- Maintained IT infrastructure for 100+ users: **Active Directory**, **Microsoft 365**, GPOs and security groups.
- LAN, switches, corporate Wi-Fi, IP telephony (**VoIP**) and intranet deployment; inventory and license auditing with **OCS Inventory**.
- **Python** scripts for recurring tasks, including a VoIP call-alert system backed by SQL Server.

PROJECTS

Transcripto *(Python, React, Tailwind, SQLite, Faster-Whisper, PyTest)* — Desktop app that turns meetings into Word minutes, with local or cloud transcription and a real-time audio pipeline. Demo: transcripto-showcase.vercel.app

Self-hosted home lab *(Debian, Docker Compose, Nginx Proxy Manager, CrowdSec, WireGuard)* — 24/7 server with 15+ containers, TLS reverse proxy, IPS and VPN; FastAPI + Playwright API orchestrated with n8n.

Spring Boot & Keycloak microservices *(Java 21, Spring Boot, Keycloak, OAuth2/JWT, Docker)* — Distributed backend with API Gateway and centralized authentication.

TECHNICAL SKILLS

Languages: Python (2 yrs), SQL (SQL Server, MySQL, SQLite), Java 21 / Spring Boot, JavaScript / React, C# / .NET (basic)

Development & Integration: REST APIs & JSON, FastAPI / Flask, Playwright / PyTest, Keycloak / OAuth2 / JWT, GeneXus (integration), n8n

Infrastructure & DevOps: Docker & Docker Compose, Linux (Debian/Ubuntu), Git / Forgejo / GitHub, CI/CD (GitHub Actions, Forgejo Runner), Nginx, PKI (EJBCA / SignServer)

Process: Requirements gathering, Functional analysis, Redmine, Scrum

EDUCATION

B.S. in Information Systems Engineering (in progress, 4th year) — Universidad Tecnológica Nacional – Facultad Regional Córdoba (UTN-FRC) — 2022 – 2027 (expected)

LANGUAGES

Spanish (native) · English (B2, professional working proficiency)
